PUNEET TOMAR

Full-Stack Developer | PHP & Laravel | React.js | REST APIs | MySQL | AI-Assisted Development

+91-9643948093 puneettmr31@gmail.com Delhi NCR | Immediate joiner LinkedIn GitHub Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of professional experience specializing in Laravel/PHP applications, REST APIs, MySQL-backed features, and interactive React.js interfaces. Adept at leveraging AI-assisted development tools (Cursor, GitHub Copilot, ChatGPT) to accelerate scaffolding, debugging, refactoring, and feature implementation while maintaining code quality and manual review standards. Experienced in API integrations, authentication, database query optimization, and application deployment.

TECHNICAL SKILLS

Backend: PHP, Laravel, Lumen, REST APIs, Laravel Sanctum, JWT, MVC, middleware, validation, authentication, authorization

Frontend: React.js, JavaScript, TypeScript, Blade, Livewire, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery

Database & Caching: MySQL, relational schema design, query optimization, indexes, Redis

AI-Assisted Development: Cursor, GitHub Copilot, ChatGPT; prompting for scaffolding, debugging, and refactoring

Tools & Deployment: Git, GitHub, Postman, Swagger/OpenAPI, Vite, Docker, Linux, AWS EC2, Railway, Vercel; basic deployment experience

Testing: API testing and manual validation via Postman; automated unit testing workflows

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Remote Mar 2026 – Present

- Architect and develop Laravel business applications, admin dashboards, and secure REST API features tailored to client specifications.
- Use AI-assisted tools to accelerate implementation and troubleshoot production issues, rigorously reviewing generated changes before integration.
- Integrate third-party APIs, including payment gateways, notification systems, and email providers.
- Manage application deployment, server setup, and production troubleshooting across backend, frontend, and database tasks.

SciAstra | Full-Stack Developer | Noida, India Jan 2026 – Mar 2026

- Engineered backend core modules for a high-traffic EdTech platform serving 5,000+ active users.
- Developed, optimized, and maintained REST API endpoints to reduce response latency and server overhead.
- Built Filament and Livewire administration modules with role-based authentication and authorization (RBAC).
- Optimized production MySQL structures, queries, and indexes for maintainability and performance.

Eglogics Softech Pvt. Ltd. | Junior Laravel Developer | Noida, India Feb 2025 – Jan 2026

- Developed secure backend modules and REST API features for enterprise business applications using Laravel and PHP.
- Implemented API communication with JWT authentication, custom middleware, and request validation.
- Resolved query bottlenecks, optimized schemas, and documented APIs using Swagger/OpenAPI.

Lets Write | Laravel Developer Intern Sep 2024 – Feb 2025

- Built CRUD modules, scalable backend features, and form/request validation workflows using Laravel.
- Assisted with API development and tested endpoints with Postman.

Web Developer Intern Jul 2024 – Sep 2024

Let The Trend

- Transformed UI designs into responsive, cross-browser web pages using HTML5, CSS3, JavaScript, and Bootstrap.

SELECTED PROJECTS

AI-Powered Form Builder Completed · Public source

Laravel and Livewire form builder with schema-driven validation, public forms, searchable submissions, CSV export, document import, and queued AI generation. Source on GitHub · Demo (availability may vary).

LumenAI Knowledge Workspace Completed · Public source

Laravel AI workspace with tenant-scoped teams, Sanctum APIs, document ingestion and RAG retrieval, and an MCP interface. Source on GitHub.

Workspace & Task Manager Completed · Public source

Laravel API-first SaaS project with multi-tenant workspaces, member access, projects and tasks, Sanctum authentication, MySQL, and Redis. Source on GitHub.

TalentHub Job Portal — Completed · Private source

Implemented candidate and employer role-based workflows, dashboards with application tracking, token-based authentication, and Redis caching using Laravel, React, TypeScript, MySQL, and Tailwind CSS. Source and demo are not public; contact me for a walkthrough.

Laravel Filament Admin Dashboard — Completed · Source not public

Designed a ready-to-deploy Filament dashboard with resource management, metrics widgets, data filters, and export features. Project overview.

EdTech Course Management System — Completed · Source not public

Developed course CRUD workflows, multi-tier enrollments, student progress tracking, and role permissions for educators, students, and administrators. Project overview.

SciAstra Learning Platform — Completed professional contribution

Engineered EdTech backend modules and REST APIs, Filament/Livewire administration with RBAC, and MySQL performance improvements. Company website.

Eglogics Business Applications & API Modules — Completed professional contribution

Developed Laravel/PHP backend modules and REST API features with JWT, middleware, request validation, query optimization, and Swagger/OpenAPI documentation. Company website.

EDUCATION & CERTIFICATIONS

- **Master of Computer Applications (MCA)** — Dr. A.P.J. Abdul Kalam Technical University, 2019
- **Bachelor of Computer Applications (BCA)** — C.C.S. University, 2017
- **Full Stack Development** — Vidhyashala
- **Web Designing & PHP Development** — Aptron Solutions
